

FIXED INCOME CHARTBOOK

April 2024

Fixed Income Chartbook - Overview

Introduction

This Fixed Income Chartbook aims to paint a comprehensive landscape of the fixed income markets by providing detailed information on a wide range of inputs that are deemed to impact fixed income assets. The information provided includes the evolution of the yield curves, recent flows in fixed income ETFs, default rates and currency hedge costs. The report covers the main developed markets and the EM markets.

Summary

Fixed Income Chartbook - Yield Curve

Introduction

This Yield Curve report aims to provide a comprehensive overview of past and future evolutions of interest rates in USD, EUR and GBP. It illustrates the most recent changes in yield curves and term structures, as well as expectations of Central Bank main rates.

Summary

US Treasury Yield Curve

Federal Reserve - Last FOMC Meeting

	Now	Prev. Meeting
Fund Rate Upper Bound	5.50%	5.50%
Fund Rate Lower Bound	5.25%	5.25%
Discount Rate	5.50%	5.50%

As of 20 Mar 2024

Federal Reserve - Next FOMC Meetings

	Average Estimate
01 May 2024	5.25%-5.50%
12 June 2024	5.25%-5.50%
31 July 2024	5.25%-5.50%

Key Rate Moves since last month (in bps)

Term Structure (10Y/2Y) changes over time

German Government Yield Curve

European Central Bank - Last Meeting

	Now	Prev. Meeting
Main Refinancing Rate	4.50%	4.50%
Marginal Lending Facility	4.75%	4.75%
Deposit Facility	4.00%	4.00%

As of 11 Apr 2024

European Central Bank - Next Meetings

	Average Estimate
06 June 2024	3.90%
18 July 2024	3.80%
12 September 2024	3.70%

Key Rate Moves since last month (in bps)

Term Structure (10Y/2Y) changes over time

UK Gilt Yield Curve

Bank of England - Last Meeting

	Now	Prev. Meeting
Base Rate	5.25%	5.25%

As of 21 Mar 2024

Bank of England - Next Meetings

	Average Estimate
09 May 2024	5.25%
20 June 2024	5.25%
01 August 2024	5.00%

Key Rate Moves since last month (in bps)

Term Structure (10Y/2Y) changes over time

Past Performance, actual or simulated, is not a reliable indicator of future results. Forecasts are based on assumptions, estimates, opinions and hypothetical models or analysis which may prove to be incorrect.

1. The probabilities of changes in Central Bank rate on future Central Bank Meeting date are calculated using OIS ("Overnight Indexed Swap") rate curve points. The methodology is based on estimated changes in forward rate (as implied by the OIS Curve) and corrected to match the Central Bank main rates.

EUR Fixed Income

Introduction

This report aims to provide a comprehensive overview of the EUR Fixed Income landscape. It covers government bonds as well as corporate IG and HY bonds. The report provides information on performance, ETF flows, default risk, yield and duration.

Rating Breakdown⁵

Source Bloomberg LP, DWS Calculations. As of 30 Apr 2024.

Past Performance, actual or simulated, is not a reliable indicator of future results. Forecasts are based on assumptions, estimates, opinions and hypothetical models or analysis which may prove to be incorrect.

1. Yield to Worst and Modified Duration as provided by Bloomberg Barclays. Global indices's performance are shown in USD.

2. Market Cap per country and per category are calculated by summing the market value of the individuals bonds creating the relevant indices

3. Change in Outstanding Amounts per country and per category are subtracting the Amounts Outstanding as of the report data and as of 12 Months before the report date. Outstanding Amounts per country and per category are calculated by summing the outstanding Amounts of the individuals bonds creating the relevant indices

4. All Statistics and information are calculated by aggregating individual bond data and aggregating it at the country level sub indices.

5. The rating split is calculated by aggregating the ratings of each individual bonds in the relevant index

6. For those decompositions, the following two indices have been used Bloomberg Barclays EM USD Aggregate Index and Bloomberg Barclays EM Local Currency Government Index

Inflation Linked Bonds

Introduction

This report aims to provide a comprehensive overview of the inflation-linked Fixed Income landscape. It covers government bonds only and it provides information on performance, market characteristics, spread between breakeven levels and realized inflation. It also looks at the recent performance of nominal bonds as compared to inflation-linked bonds.

Summary

Past Performance, actual or simulated, is not a reliable indicator of future results. Forecasts are based on assumptions, estimates, opinions and hypothetical models or analysis which may prove to be incorrect.

1. Yield to Worst and Modified Duration are calculated using yields and duration calculated by Bloomberg and using the bond weights as published by Barclays. Global indices's performance are shown in USD.

2. Source Bloomberg. All active bonds in Bloomberg database are considered for this analysis. Bonds are split by Country of Incorporation and years to maturity. The aggregation is done in USD calculated as of the issue date for each bond.

3. The relevant index for inflation for the given country is used here i.e. the exact index used to determine the payment in the inflation-linked bonds issued by that country.

FX Overview

Introduction

The report aims to provide a comprehensive overview of the FX market and the impact of currency hedging on Fixed Income Asset. In unhedged bond instruments, currency fluctuations tends to be a greater contributor to risk than yield fluctuations. In the following sections, we provide an overview of returns and volatility by major currency pairs, estimated yield of indices (hedged and unhedged) and the cost of hedging currency risk.

Summary

Source Bloomberg LP, DWS Calculations. As of 30 Apr 2024.

Past Performance, actual or simulated, is not a reliable indicator of future results. Forecasts are based on assumptions, estimates, opinions and hypothetical models or analysis which may prove to be incorrect.

1. Risk Measures are calculated over the last five years period using weekly frequency observations.

2. Yield to Worst provided by Bloomberg Barclays. The estimated hedged yield is calculated by removing the estimated cost of hedging from the Yield to worst.

3. The cost of hedging is calculated using 12M forward points of the relevant currencies as published by Bloomberg on report date.

FX Overview

Introduction

This report aims to provide a comprehensive overview of the FX market and the impact of currency hedging Fixed Income Assets. In particular it focus on hedging costs.

Fixed Income Assessment Framework - Glossary

Definitions

Breakeven	It is the market expectation for future inflation as implied in Inflation-linked bonds. This is the inflation level the market is currently expecting to be realised in the future reading of the Price Index. Breakeven inflation = nominal yield - real yield
Cost of Currency Hedging	Cost of hedging the FX risk of a currency versus an other over the next 12 months (estimated using 1Y FX Forwards)
Credit Default Swap Spread (CDS Spread)	Payment made by the buyer of the financial swap agreement in exchange for protection against default of the underlying bond. In event of a default, the buyer will receive compensation for the difference between par value and market value. CDS spreads are often used as a credit risk measure on both governments and corporates.
Default Rate	The number of issuer defaults compared to the total number of issuers over a given period. This report shows S&P Long Term Local ratings data.
Duration	It indicates the sensitivity of a bond price to changes in benchmark yields. The benchmark is the lowest risk local currency government bond issuer. I.e. German government yields are used as the benchmark for EUR-denominated bonds and US Treasury bond yield would be the benchmark for USD-denominated bonds.
FOMC Meeting	The Federal Open Market Committee Meetings are the meetings of the monetary policy making body of the Federal Reserve used among other things to set the Fed Fund Rates.
Hedged Yield	Yield corrected for the cost of FX hedging. For example, in the case of US Treasuries EUR Hedged it would consist of the Yield to Worst of the US Treasuries adjusted by the cost of hedging the FX risk of USD vs EUR over the next 12 months (estimated using 1Y FX Forwards)
Issuance	Amount of debt issued by a specific issuer over a given period of time
Main Refinancing Rate	The main refinancing rate, or minimum bid rate, is the interest rate which banks have to pay when borrowing money from the ECB. Banks do so when they are short on liquidity.
Marginal Lending Facility	The Eurosystem offers credit institutions two standing facilities: the Marginal lending facility in order to obtain overnight liquidity from the central bank, against the presentation of sufficient eligible assets and the Deposit facility in order to make overnight deposits with the central bank.
Deposit Facility	
OAS	Option Adjusted Spread (OAS), also called Credit Spread Bond yields can be divided into 2 components: benchmark yield (for example German or US government bonds) and the credit spread reflecting the reward for the credit risk associated to the particular bond (driven by the issuer's credit quality). For bonds with an embedded option, the credit spread should be adjusted to account for the optionality effect and thus become the option adjusted spread or 'OAS'. In order to account for the optionality, the yield to worst is used in its calculation. OAS = yield to worst – benchmark government bond yield of similar duration.
Rate Change Probability	The probability that the Fed fund rate (resp Main Refinancing Rate, resp BoE rate) will reach a given level at certain points in the future as calculated using the relevant forward OIS ('Overnight Indexed Swap') rate curve.
Real Yield	The Real yield is the yield after inflation is taken into account. In other words it's the yield if inflation was zero. Real yield = nominal yield – breakeven inflation.
Risk Contribution	It is defined as the duration multiplied by the OAS by the weight in the index. It is used a measure of risk contributed by the specific asset to the overall index
Term Structure	The term structure is the relationship between yields of different maturities
Upgrade/Downgrade Ratio	It is the ratio between the number of issuers being upgraded divided by the number of issuers being downgraded in a given period. This report shows use S&P Long Term Local ratings data.
Yield Curve	A yield curve shows the relationship between yields and maturities for similar securities such as treasuries or bunds.
Yield to Worst	The lower of yield to call or yield to final maturity. Yield to worst and yield to maturity will be equal for bonds without calls.

DWS is the brand name of DWS Group GmbH & Co. KGaA and its subsidiaries under which they operate their business activities. The respective legal entities offering products or services under the DWS brand are specified in the respective contracts, sales materials and other product information documents. DWS, through DWS Group GmbH & Co. KGaA, its affiliated companies and its officers and employees (collectively "DWS") are communicating this document in good faith and on the following basis.

This document has been prepared without consideration of the investment needs, objectives or financial circumstances of any investor. Before making an investment decision, investors need to consider, with or without the assistance of an investment adviser, whether the investments and strategies described or provided by DWS Group, are appropriate, in light of their particular investment needs, objectives and financial circumstances. Furthermore, this document is for information/discussion purposes only and does not constitute an offer, recommendation or solicitation to conclude a transaction and should not be treated as giving investment advice.

The document was not produced, reviewed or edited by any research department within DWS and is not investment research. Therefore, laws and regulations relating to investment research do not apply to it. Any opinions expressed herein may differ from the opinions expressed by other legal entities of DWS or their departments including research departments.

The information contained in this document does not constitute a financial analysis but qualifies as marketing communication. This marketing communication is neither subject to all legal provisions ensuring the impartiality of financial analysis nor to any prohibition on trading prior to the publication of financial analyses.

This document contains forward looking statements. Forward looking statements include, but are not limited to assumptions, estimates, projections, opinions, models and hypothetical performance analysis. The forward looking statements expressed constitute the author's judgment as of the date of this document. Forward looking statements involve significant elements of subjective judgments and analyses and changes thereto and/ or consideration of different or additional factors could have a material impact on the results indicated. Therefore, actual results may vary, perhaps materially, from the results contained herein. No representation or warranty is made by DWS as to the reasonableness or completeness of such forward looking statements or to any other financial information contained in this document. Past performance is not guarantee of future results.

We have gathered the information contained in this document from sources we believe to be reliable; but we do not guarantee the accuracy, completeness or fairness of such information. All third party data are copyrighted by and proprietary to the provider. DWS has no obligation to update, modify or amend this document or to otherwise notify the recipient in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate.

Investments are subject to various risks, including market fluctuations, regulatory change, possible delays in repayment and loss of income and principal invested. The value of investments can fall as well as rise and you might not get back the amount originally invested at any point in time. Furthermore, substantial fluctuations of the value of any investment are possible even over short periods of time. The terms of any investment will be exclusively subject to the detailed provisions, including risk considerations, contained in the offering documents. When making an investment decision, you should rely on the final documentation relating to any transaction.

No liability for any error or omission is accepted by DWS. Opinions and estimates may be changed without notice and involve a number of assumptions which may not prove valid. DWS or persons associated with it may (i) maintain a long or short position in securities referred to herein, or in related futures or options, and (ii) purchase or sell, make a market in, or engage in any other transaction involving such securities, and earn brokerage or other compensation.

DWS does not give taxation or legal advice. Prospective investors should seek advice from their own taxation agents and lawyers regarding the tax consequences on the purchase, ownership, disposal, redemption or transfer of the investments and strategies suggested by DWS. The relevant tax laws or regulations of the tax authorities may change at any time. DWS is not responsible for and has no obligation with respect to any tax implications on the investment suggested.

This document may not be reproduced or circulated without DWS written authority. The manner of circulation and distribution of this document may be restricted by law or regulation in certain countries, including the United States.

This document is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, including the United States, where such distribution, publication, availability or use would be contrary to law or regulation or which would subject DWS to any registration or licensing requirement within such jurisdiction not currently met within such jurisdiction. Persons into whose possession this document may come are required to inform themselves of, and to observe, such restrictions.
